EXPERIENCE

Co-founder, Manager

Creation Labs • Vellore, IN
Feb 14' - July 17'

A student driven space where students and faculty are encouraged to come together to design and innovate on projects in multidisciplinary teams.

- Establishment, creation of structure & application process.
- Design & branding development, UI/UX design for websites.
- Expansion from 8 members to over 300 with 40 projects.
- Personally mentored over 15 teams.
- Planned and coordinated 10+ events, catering to over 3000 students.

Co-founder, Design & IT Lead

We Are Allies • Boston, USA
Sept 16' - Present

A non-profit made up of doctors, pharmacists, designers, engineers and people in recovery with a goal to help prevent opioid overdose deaths and to support those suffering from addiction.

- Leading the team developing the website, ecommerce site & the mobile apps.
- Development and realization of branding for the company.

UI/UX designer

Actonate • Baroda, IN
Feb 12' - Nov 14'

A tech consulting firm with years of experience in building and running large scale products on the cloud. Working with numerous enterprises and startups across multiple sectors, helping them build new products.

- Lead the design team to conceive, develop and present memorable digital experiences for over 10 clients.
- Worked on realizing branding and strategy for multiple clients.

Freelance designer

Various Companies/Clients
Feb 12' - Dec 16'

PROJECTS

Samaritan

Service that provides insights and trends of patients suffering from leukemia, using neural networks to aid the doctor in diagnosis.

Larvafinder

Add-on device combined with a mobile app for public health agents to reliably detect in real-time, the presence of mosquito larvae in water bodies.

Won 1st place at Zika Hackathon, Boston

Protray.me

Dynamic autogenerated narrative of your life based on info stored on phone - Location, fit data, Uber trips, Facebook posts, etc by using machine learning & NLG.

Won Two Sigma Award at Pennapps XIII, Philadelphia

Weebo

Creating a safe, intuitive and beautiful communication device for young children to stay in touch with their parents replacing the smart phone.

Poshan

Unique set of smart utensils specifically designed with embedded sensors to measure nutrition in babies in rural settings.

Wabbit

Innovative way for storytelling and story creation, made handy to read and write, through the intuitive and easy to use UI on mobile applications.

Preleprosy

Algorithm on an app that uses a large image database, machine learning and neural networks to predict within minutes if a skin lesion is an indication of leprosy.

Won 1st place at Jugaadathon 2014, Bangalore

Fxii

A cost effective, immediate first aid response to a bone fracture. Modeled like a spray can for quick application. Solidifying hard foam, immobilizing the fracture till patient reaches hospital.

Won ABinBev Award at Jugaadathon 2014, Bangalore

CLIENTS

ACHIEVEMENTS

University Innovation Team Award
Vice Chancellor, VIT University
May 2014

Special Achiever Award
Chancellor, VIT University
April 2014

7 Awards from various hackathons
Global, 2013-16'

Multiple Grants, Investments for
product development
Global, 2014-16'

Voted 'Best Designer in VIT'
Quora, 2013

EDUCATION

Bachelors in Electronics & Comm. Engg (B.Tech)

VIT University, Vellore, IN • 2011 Batch

- Redesigned and Redeveloped VIT University's Main website in a team.
- Oversaw the establishment of an Innovative makerspace for students.
- **Clubs & Chapters** - Creative Director - IEEE VIT students chapter, Design Coordinator for fests Riviera 2012, 13', 14'. Designer for band Drift, Technology & Gaming club, International Students club, Debate society, RoboVITics, Yearbook, Ayuda, Sanshray, Pravega Racing.

ABOUT

I'm Aravind, a digital product designer, based out of Chennai, India happily designing for the past 5 years. A manager at Creation labs helping teams design / build technology solutions.

Having no formal design education, everything I know has been through years of learning from failures and trials, applying myself on many diverse and distinct projects. Though primarily focusing on UI/UX design, I did learn valuable skills gained experience on frontend and backend dev, branding, strategy, Product development and design, Industrial design, Healthcare solutions among others. I believe this diversity in experiences gives me a unique edge when working on complex interdisciplinary projects.

The journey so far has taught me that the right design is always difficult, and the best solution is the simplest. Important work is the result of passion, curiosity, perseverance, open-mindedness, skill and the gumption to keep learning.

Areas of work

- User Interface Design
- Interaction & User Experience Design
- HTML/CSS - Web Design
- Branding
- Product Designer
- Projects & Team Management

Special areas of interest

Low cost healthcare solutions

Designing affordable and simple solutions to common healthcare problems in low cost settings like India, Uganda, Panama.

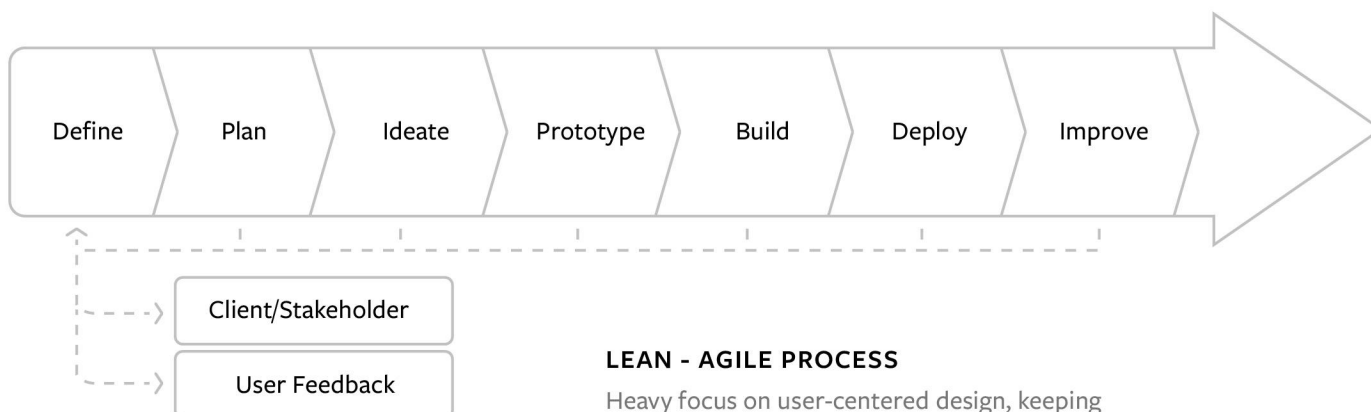

Hackathons

Encouraging people (& myself) to come together and tap into creativity and produce new / improve existing ideas to better serve community.

Makerspaces

Collaborative workspaces with fully flushed out equipment and space for students for making, learning, exploring and sharing ideas and projects.

PROCESS

LEAN - AGILE PROCESS

Heavy focus on user-centered design, keeping the user in the loop, continuously iterating. As a self taught designer, I understood the impact of user experience through user feedback.

The following projects provides an insight into my process and skills

DESIGN PORTFOLIO

Selected works of User Experience Designer **Aravind Prasad**

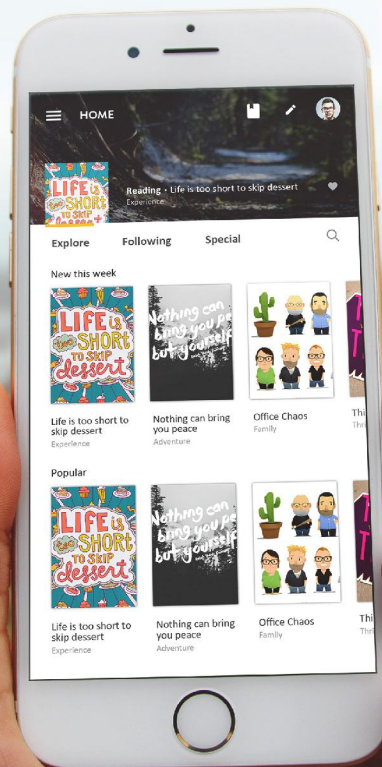

Wabbit

A new way for storytelling and story creation

I led the design, research and testing for the iOS application for this startup.

UI/UXD - March 2016

Partnered with the project manager, iOS developer and a content creator to realize the design of their first version.

Designed high fidelity mockups and prototypes to share the vision and conceptualize the idea. Focused on goals and features at launch, negotiated features for the future.

Through meetings and user feedback, uncovered insights, addressed user behaviours and translated concepts into features of the App.

Good Fast Cheap

Good Looking, Works as it should, Easy to Impliment

Since this was a new product from the startup, the focus was on getting it right the first time, quickly and continously re-iterating as improvements.

Process

Discover & form insights

Run Scenarios

Create low fiedlity mockups

A/B tests - User tests

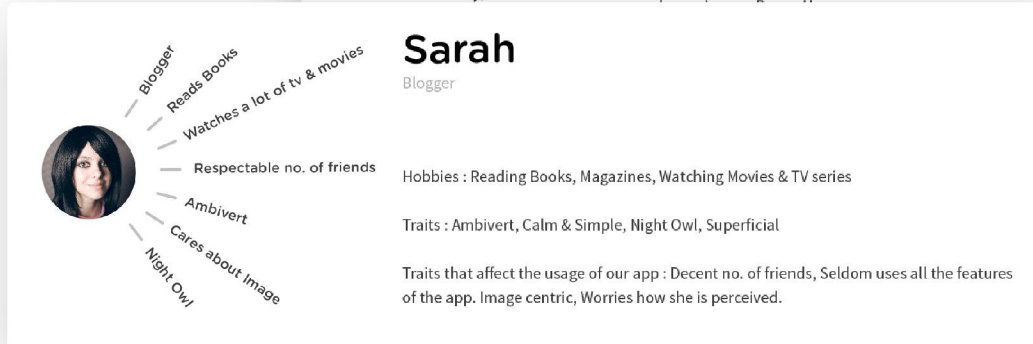

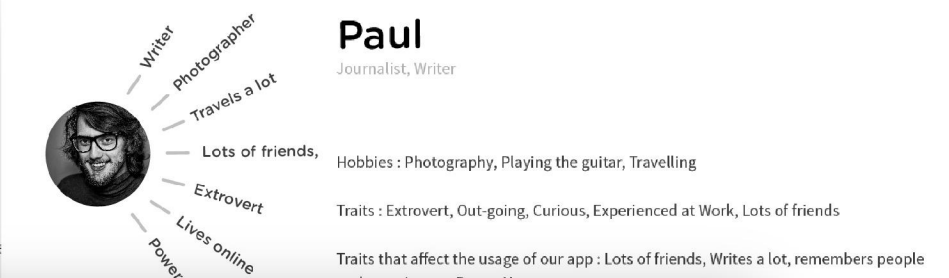

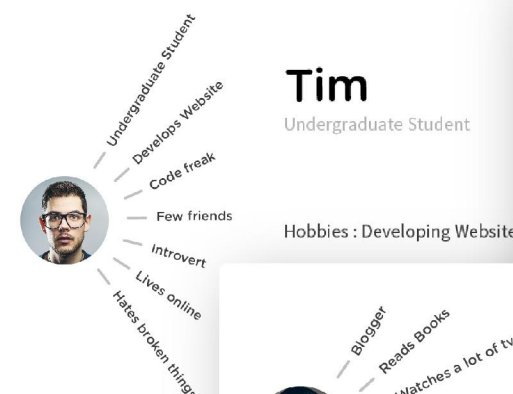

Iterate

High fidelity mockups

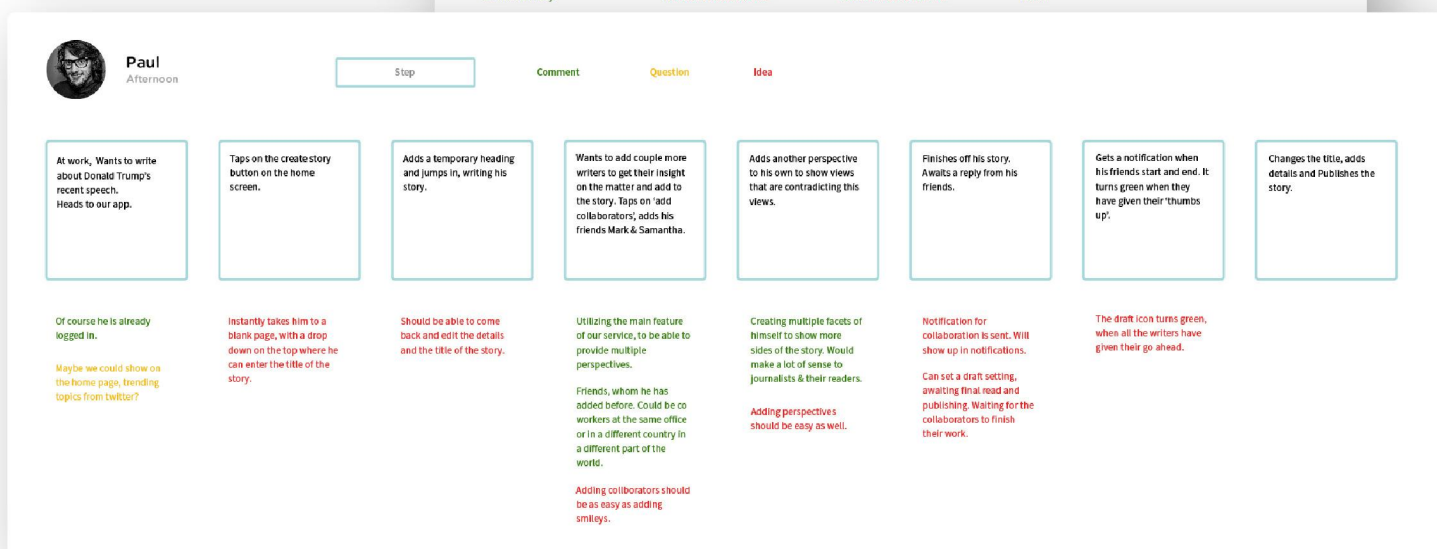

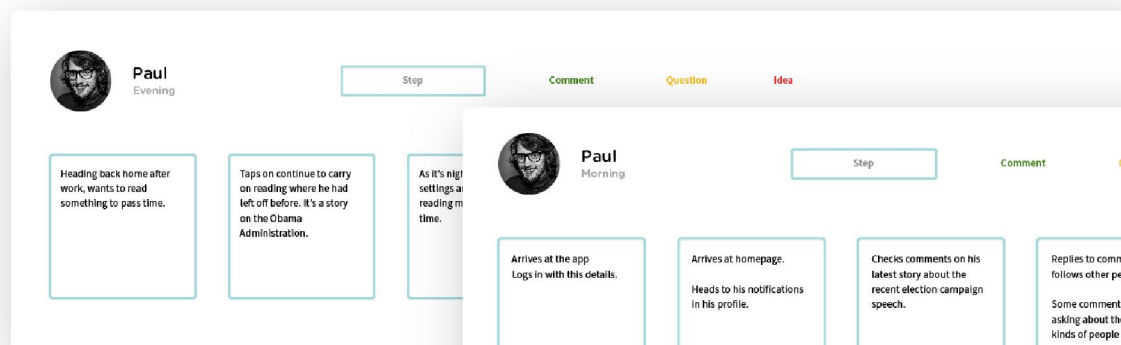

Prototype & Deploy

DESIGN PORTFOLIO

Selected works of User Experience Designer **Aravind Prasad**

Started off with creating user personas for our targeted demographic.
And running scenarios with our users, their behaviors, their problems, the pain points in the usage of the app.

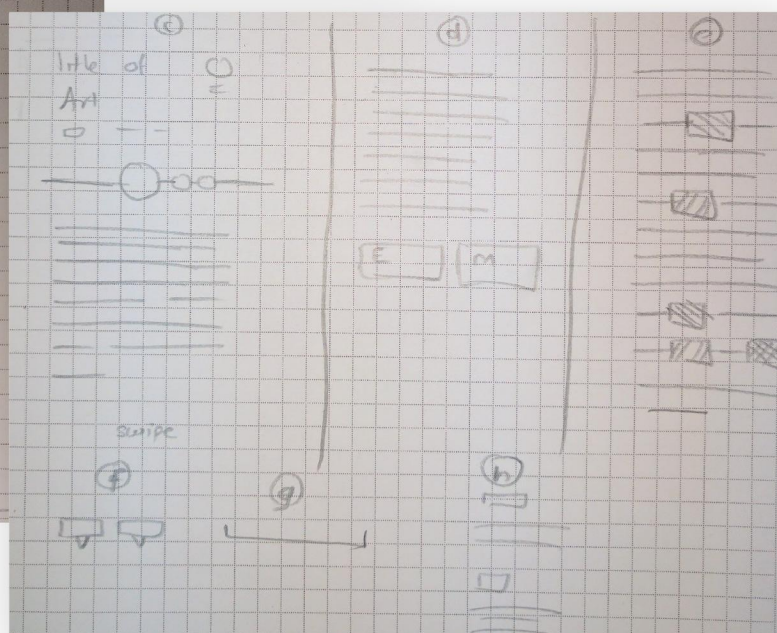

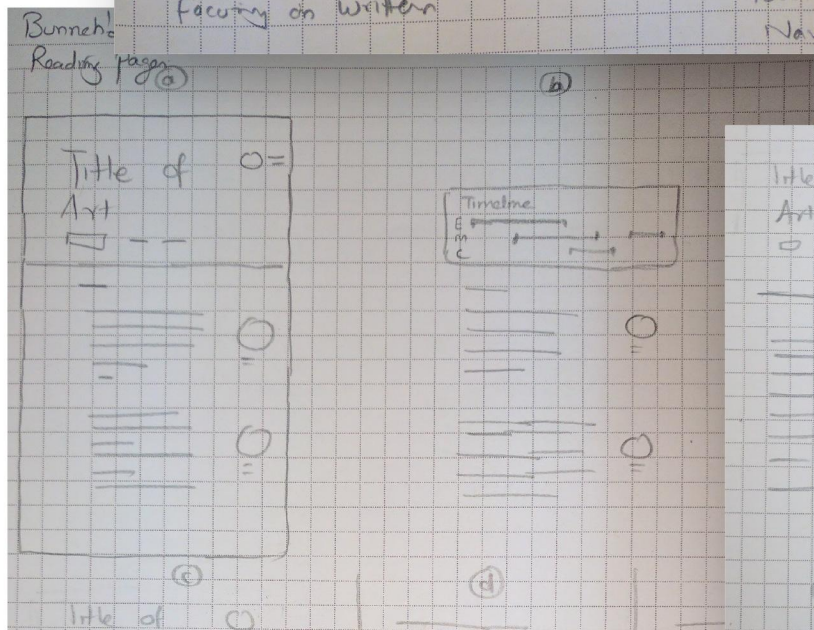

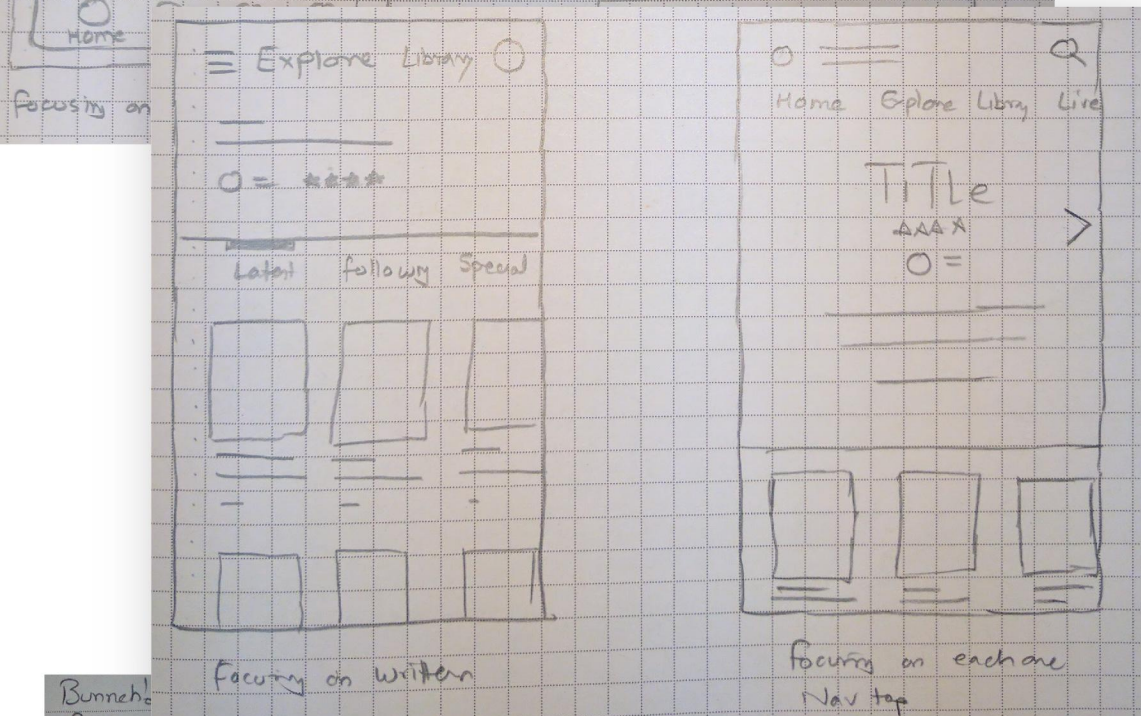

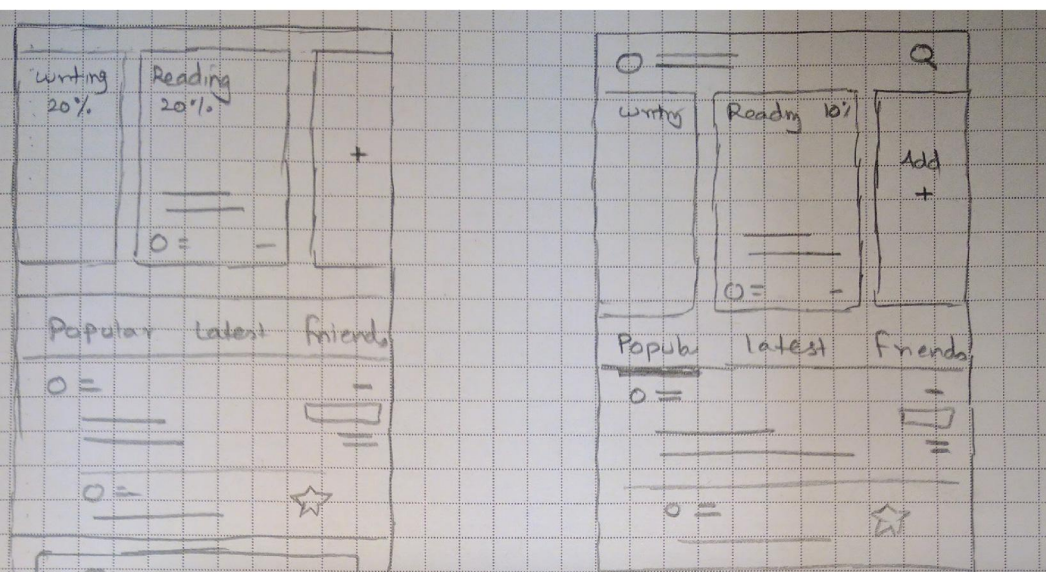

DESIGN PORTFOLIO

Selected works of User Experience Designer **Aravind Prasad**

WIREFRAMING

Wireframing the various different ideas and layouts for the homepage as well as other pages such as the reading section.

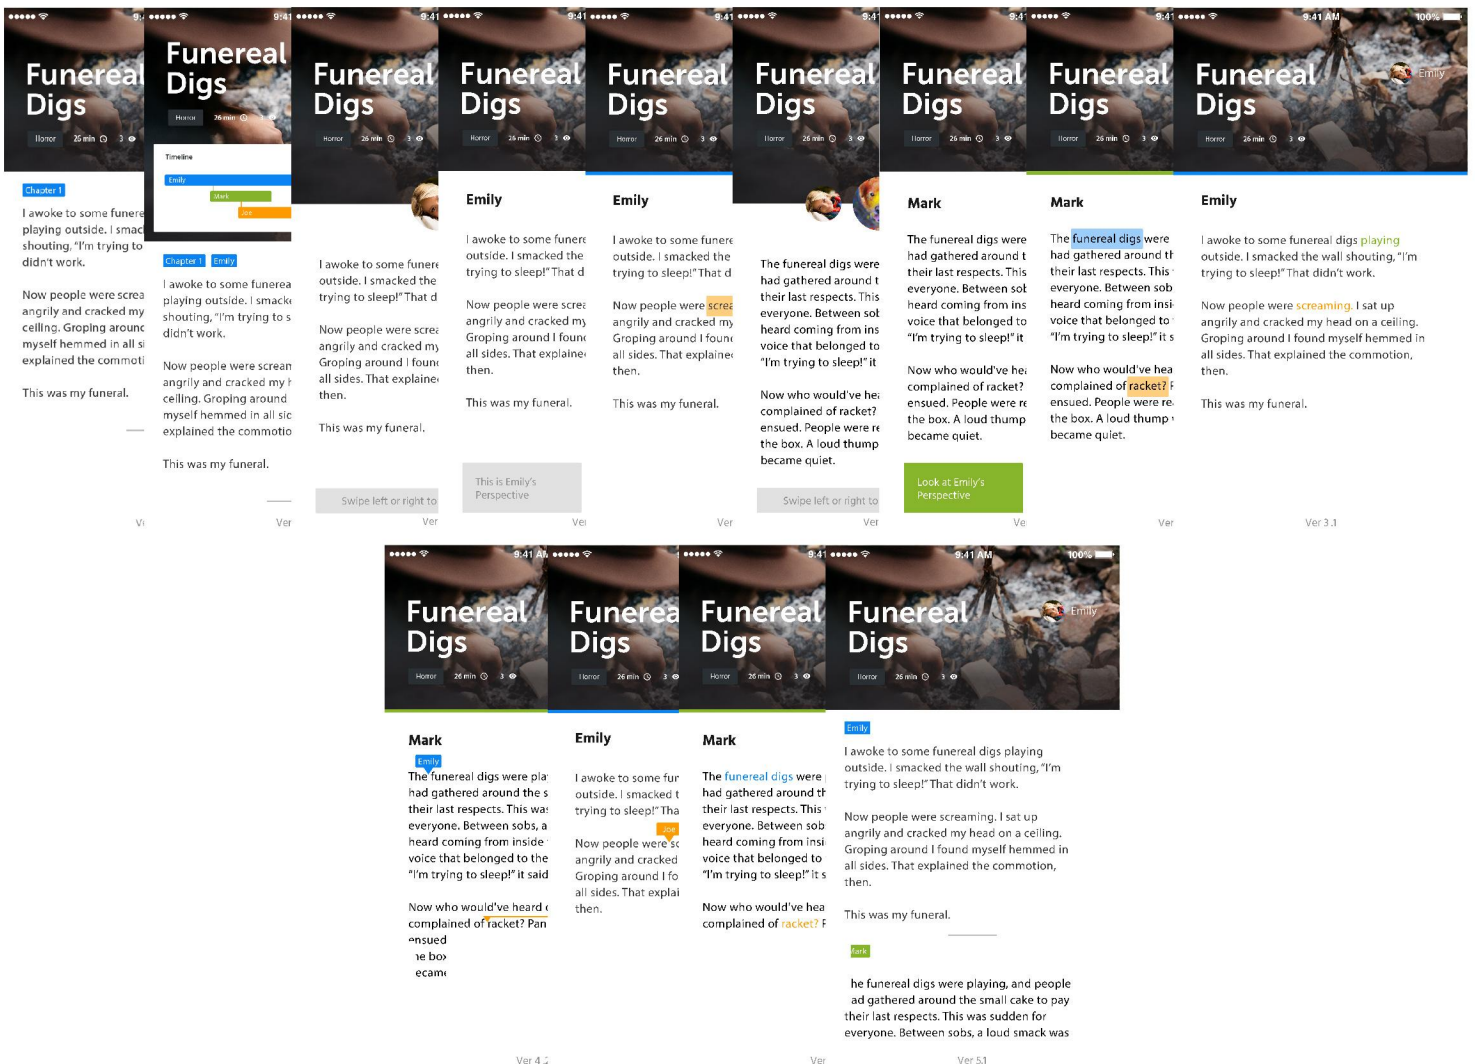

This was a challenge due to the unique nature of the way of reading. We wanted to get it right, and focused on testing each layout with the users, to check for easy flow and easy to understand interface.

Selected works of User Experience Designer **Aravind Prasad**

Testing the various layouts created with users directly, asking them to explain their user flow. From the results we were able to pin point what users liked and what they disliked. We focused on making those better.

DESIGN PORTFOLIO

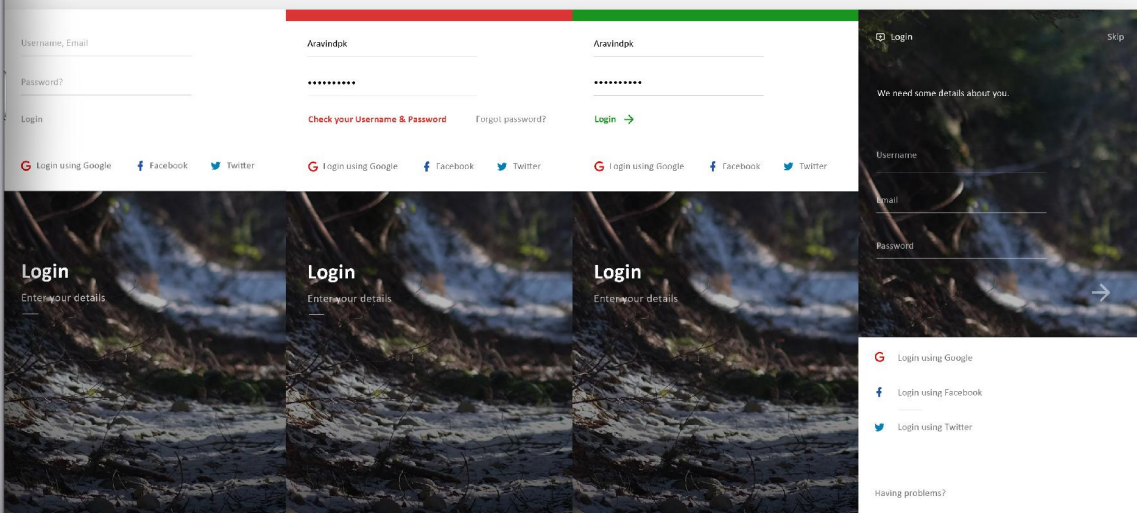

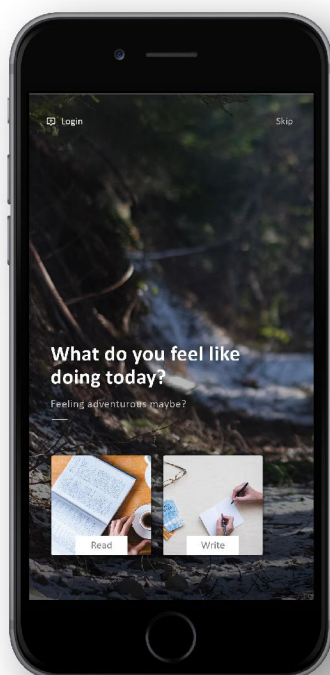

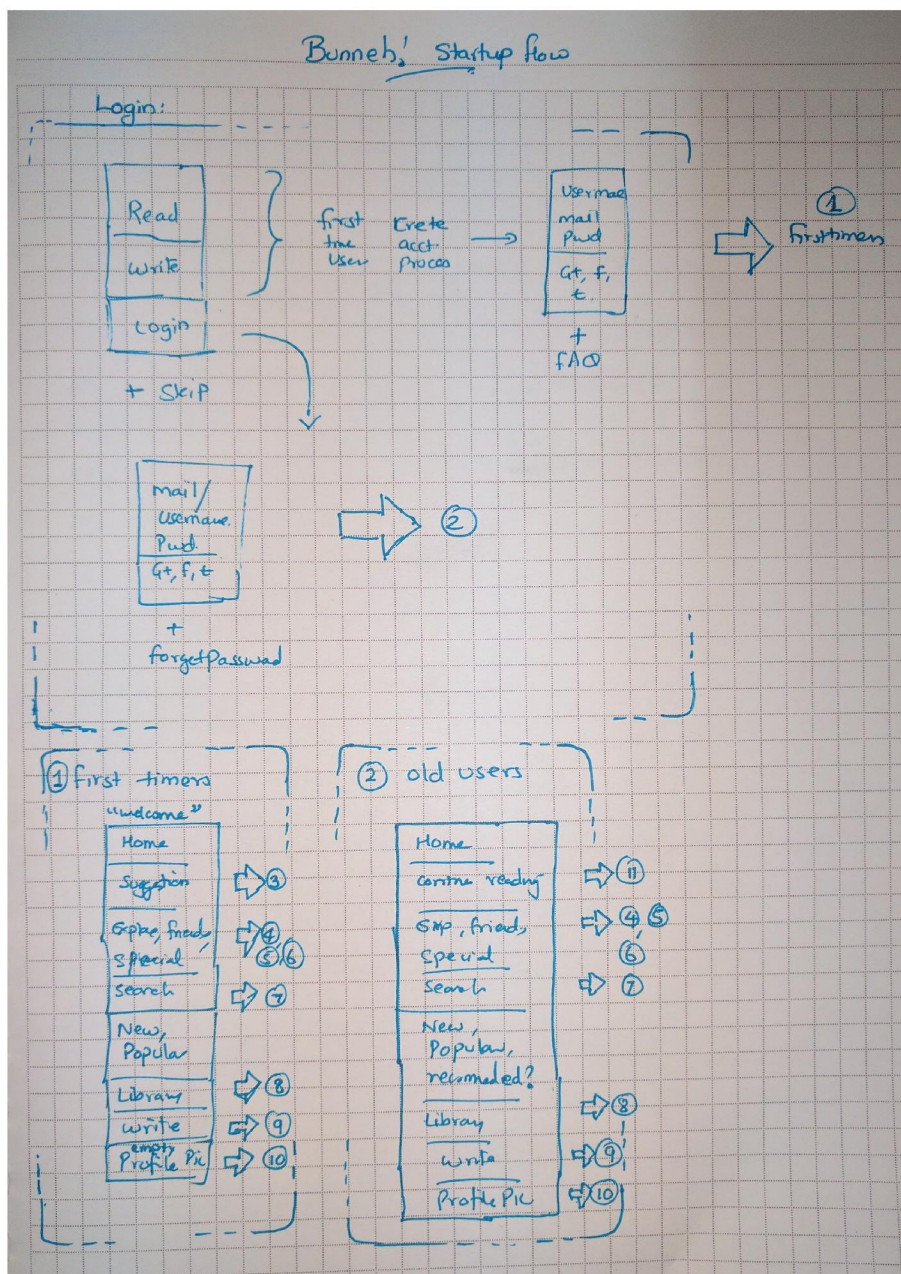

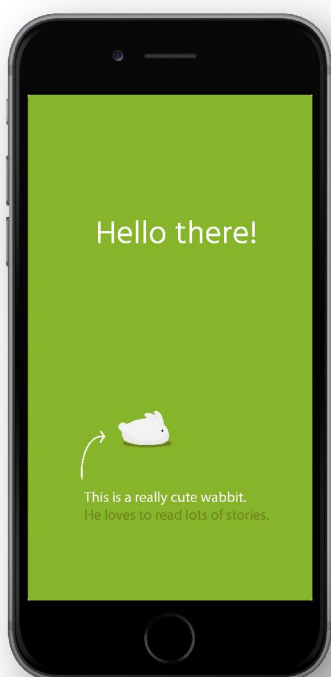

Selected works of User Experience Designer **Aravind Prasad**

LOGIN

We found from user testing that most users don't want to spend an incredible amount of time on logging in.

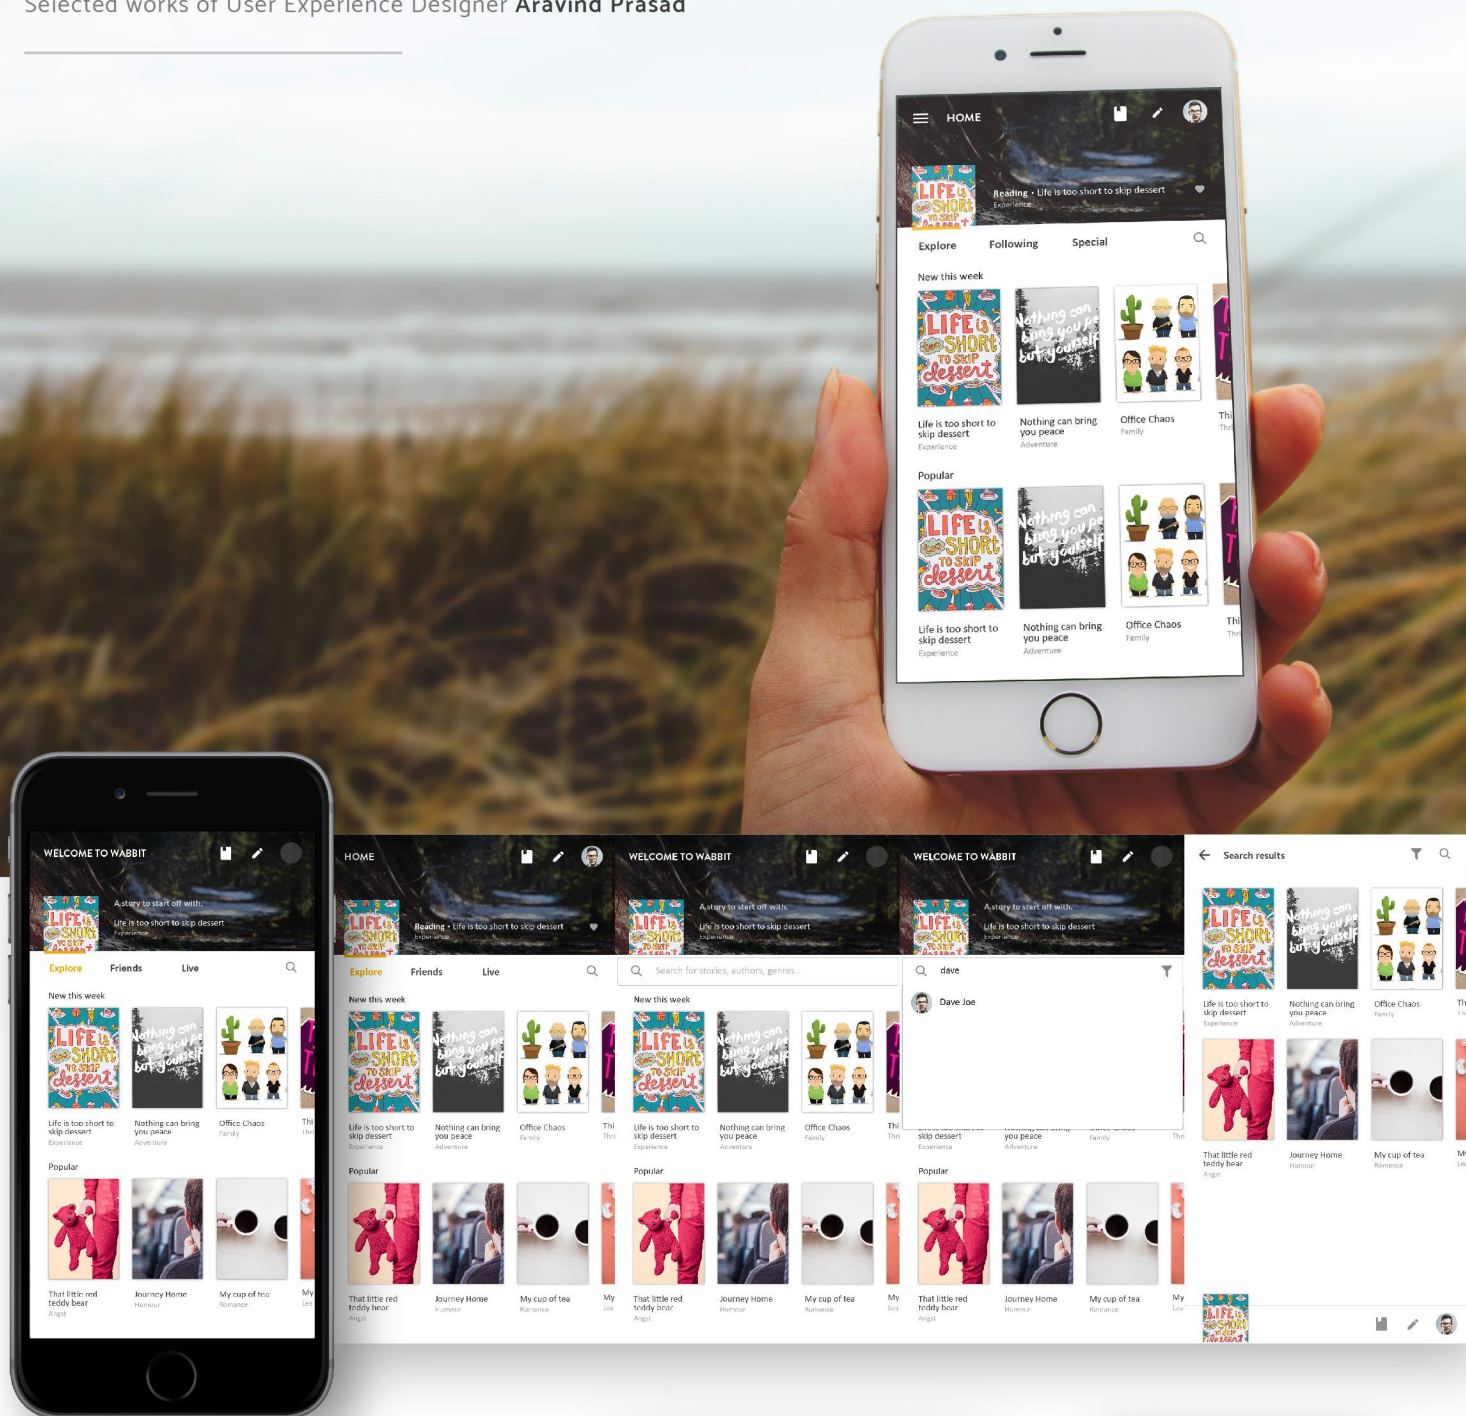

We've designed it in a way, anyone can quickly get into reading/writing with just a tap. But if they want to save their progress, they would have to login.

We've strived to make that login process extremely easy too.

DESIGN PORTFOLIO

Selected works of User Experience Designer **Aravind Prasad**

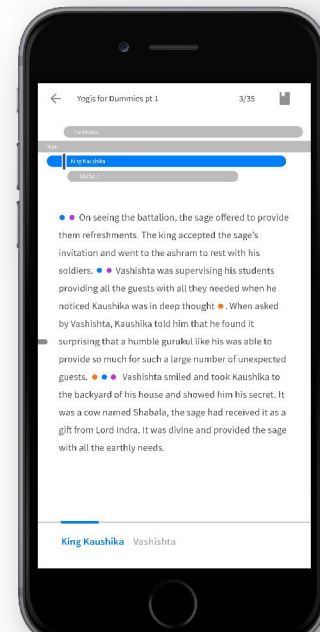

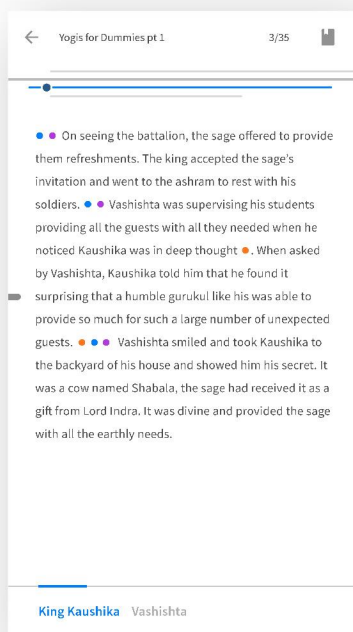

PROTOTYPE

A prototype was created from the mockups that were developed into the iOS application for Wabbit.

This first version saw a good amount of success until it was unfortunately shelved due to circumstances.

The experience gained from this project has none the less improved my skills at developing a user-centered product.

DESIGN PORTFOLIO

Selected works of User Experience Designer Aravind Prasad

EXAMPLES OF WIREFRAMING AND SKETCHES

Being a self taught designer, sketching became increasingly important to understand and visualize the product. To plan the work flow and see first hand how the user will/should/shouldn't use the interface.

Whether paper & pencil, Balsamiq, Invision etc, I believe wireframing is very important.

EXAMPLES OF WEB INTERFACES

Over the years I've worked on quite a few websites, here are just a few to showcase my work.

Swych is going to change the way you learn languages. Do away with boring vocabulary lists. Read your favorite books and master a new language at the same time. Swych will ensure you learn a new language just the way you learned your first.

A **Revolutionary** Language Learning Application

Read & Learn

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Praesent nunc leo, sodales non mollis id, cursus non mi. Fusce sit amet massa nec nunc porttitor finibus. Ut blandit justo ut diam ullamcorper porta. Pellentesque vulputate faucibus tristique nec dictum.

- Multiple Languages**
We support six languages with many more to come.
- Go Mobile**
Read at your pace. On all devices. Anywhere.
- Updated Library**
Our books are updated regularly so you can read more of your favorite books.
- Made with love**
We make sure you have the perfect reading & learning experience.

Here's our idea in action

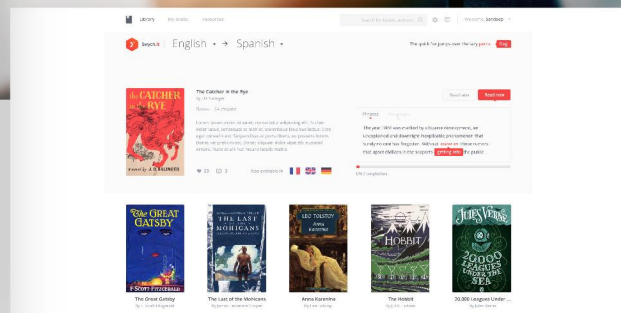

English → Spanish

MOBILE USER INTERFACES

I enjoy designing mobile layouts due to the challenges associated with creating intuitive & clear interfaces with space constraints.
